

Technology transformation for faster product roll-outs and taking a bank to the national stage

CHALLENGE

Converting systems from specific geography to national geography

Expanding the Product space

Smoothering the journey and seamlessly transitioning the merged entities

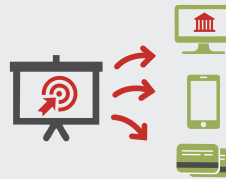

Transition to "best-in-class" technology

APPROACH

Evaluate solutions, recommend and build transformation plans

Provide strategic inputs in the product space

Create a transition Plan to integrate systems of the acquired entity

BENEFIT

Able to roll-out products faster

Created a differentiated service experience using a technology backbone

IMPACT

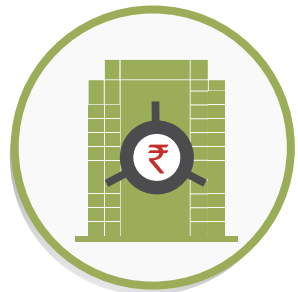

Able to increase current balance sheet by 15% and double its revenues

Awarded the Best Core Banking Implementation in 2013

"The key was to implement a technology solution which provides flexibility to users whilst having the ability to scale up in terms of data size and speed of the analysis. This has significantly helped improve productivity while helping meet credit management metrics"

CLIENT

An Indian bank that has grown from its regional offshoots to a national player through acquisitions. Has plans of becoming a leading bank with multitude of branches and other facilities in the coming year.
